JA Soft

- manufacturer: Elero
- available powers 6 Nm 9 Nm
- 0.5 m power cord with Hirschmann plug
- power supply: 230 V/50 Hz
- electromagnetic brake
- regulation of limit positions: manual
- continuous operation time: 5 min for the 6 Nm model, 4 min for the 9 Nm model
- additional safety switch
- safety class: IP44
- power: 115–156 W
- speed 26 rpm

JA Soft drives by Elero are used in facade blinds. Compared to competing products, they are distinguished by a durable gear placed in a sealed housing. Together with thermal protection, this translates into long life and reliability of the drive.

The silent electromechanical brake in Ja Soft drives allows them to achieve high work culture.

The drives use mechanical limit switches set by means of setting buttons. **They are controlled by wall and radio switches or NiceSmart modules.**
