Monoblock SOLID guide

- click system
- assembly to the window frame or building facade
- no visible mounting holes
- material: aluminium + PVC insert

The Monoblock SOLID guide is a solution designed for facade blinds. Its design allows for simple and quick assembly of the most popular systems on the market.

The SOLID monoblock is mounted "from the front". After its installation, the mounting holes remain invisible, and the guide forms a uniform and stable block. The proper guide made of PVC is attached to it using the "click" method.

The SOLID monoblock is compatible with the most popular Eko-Okien solutions:
– **RAFF-i**,
– **RAFF-e**,
– **BASIC**,
– **ROKATOP**.
