

Muntin bars

✓ material: aluminium

✓ recommended muntin bar widths: 8, 18, 26, 45 mm

✓ colour options for 8 mm muntin bars: gold, matte gold, matte silver, white

✓ colour options for wider muntin bars: RAL palette and any veneer package

Aluminium-made, our internal decorative muntin bars are a stylish addition that gives windows a unique character. We recommend opting for one of the four most popular widths to achieve the best effect.

Muntin bars with a width of 8 mm are available in several attractive colours. Wider muntins offer a choice of RAL and veneer palettes. They allow the creation of a beautifully cohesive composition or introduce bold contrasting elements into the glazing.
