Unico

- profile with a construction depth of 2-3/4" (70 mm)
- overall glazing thickness up to 1-5/8" (42 mm)
- galvanized steel profiles
- powder coating in any color from the RAL palette
- profile with a thermal break

The UNICO window system with a thermal spacer, which is ideally suited to buildings with a high energy consumption ratio. With its use, we can make not only windows, but also doors, shopcases and all types of spatial structures.

STEEL UNICO FORSTER DOOR
