

Vegas Plisse DUO pleated roller blind

- ✓ Two independently operated fabrics in one blind
- ✓ Easy removal and reattachment
- ✓ Non-invasive installation on the window frame
- ✓ Invasive installation to glazing bead or window frame
- ✓ Adapted to roof windows
- ✓ A wide catalogue of colours and structures of the material
- ✓ Profiles in any RAL colour and wood-like

The Vegas Plisse DUO pleated roller blind is a popular interior option, which uses two independently sliding fabrics on one window. This makes it easy to shade only a selected part of the window to the optimal degree, leaving the rest unobscured.

The roller blind can incorporate materials of different aesthetics, which will also differ in the degree of shading provided. During the day, the roller blind will effectively block out the excess sun, while in the evening, it will not restrict the light, instead decorating the interior.

The basic version of the roller blind has three profiles, and the pieces of material are connected. **The four-profile version completely separates the fabric so it can be divided into top and bottom blinds**, leaving open space between them. Regardless of the option chosen, the Vegas Plisse DUO will only require a small part of the window when folded.

Mounting clips with snap fasteners allow for **quick, non-invasive installation and equally convenient removal of the roller blind to wash the fabric.**
